PROFILE

Bachelor of Business & Information Systems (BBIS) student at the University of Management and Technology, Lahore, with hands-on academic work in Power BI, Oracle Database, SAP ERP and Odoo, plus internship exposure to production planning at Sapphire Mills. Interested in entry-level roles across ERP/business systems, business analysis, data analytics and operations.

EXPERIENCE

Intern — Central Planning Department (CPD)

Sapphire Mills Limited • 21 Jul-21 Aug 2025

- Observed the end-to-end production flow of apparel articles from production initiation through finishing and dispatch.
- Learned how the Central Planning Department coordinates across production functions to monitor status, identify delays and keep work moving through the workflow.
- Built a practical understanding of production status monitoring, cross-functional coordination and centralized planning in a textile manufacturing environment.

SELECTED ACADEMIC PROJECTS

E-Commerce Performance Dashboard — Power BI

Cleaned and prepared an e-commerce dataset, then built a dashboard to track and analyze store data and performance.

Rent-a-Car Database System — Oracle Database

Designed and managed a complete database for a Rent-a-Car system, applying core database design and data-management concepts in a practical project.

Website Customer Behaviour & Analytics — Web Marketing

Analyzed website engagement and customer behaviour, including response patterns, page/section engagement and time spent across the website.
